

**Climate Smarter is an exciting topical STEM/digital skills project for second and third level pupils.**

This project is designed to enthuse and inspire pupils to think creatively to come up with solutions to the biggest global problems to face them, now, and in their future. The project takes them on a journey of investigation and experimentation to look at how we can tackle the climate emergency.

The experiments and activities can be delivered as one-off sessions in an extra-curricular club over several weeks or alongside other lessons as a programme with a full class. **The programme culminates in the pupils designing and building models of their future eco-school**, incorporating all their research into energy efficiency, smart controls, energy generation and responsible water use. They will showcase this model at one of our celebration of STEM events.

## What you will get

Teachers will be provided with a guide booklet, including an overview of the activities and guidance on where the project could support you, as you plan learning and teaching using the experiences and outcomes, across several curricular areas. We will also provide any worksheets required.

YESC will provide all schools taking part in the project with a kit of equipment that will allow pupils to carry out experiments and investigations into renewable energy, smart controls energy storage and more. The materials in the kit can be incorporated into the end of project model, which can be built out of readily available recycled materials.

## The Pilot

This is a pilot project. We are asking the 50 schools across Scotland that take part to provide feedback during and after the project so that we can develop and improve it. This feedback will allow us to work with our project partners Vattenfall and Wood, and hopefully secure funding to grow this project in future years.

We also ask that you share progress / activity photos and updates across social media wherever possible.

[@scdiYESC](https://twitter.com/scdiYESC)

[#climatesmarter](https://twitter.com/climatesmarter)

[@VattenfallUK](https://twitter.com/VattenfallUK)

[#vattenfallcommunity](https://twitter.com/vattenfallcommunity)

[@Woodplc](https://twitter.com/Woodplc)

The main thing with this project is that we want the equipment to be used. Please only sign up for this project if you are confident you will be able to make use of it and are happy to provide us with feedback on your experiences as required.

Bring it all together

## 1) Model of your future school

The final challenge of this project is to **design and build a model of your future eco-school** to demonstrate the results of your investigation into electricity generation and storage, water sustainability and smart controls/sensors. Please note for entering the Climate Smarter **this does not need to be a working model**.

You can use any of the materials provided in the kit as part of your model. You can use other materials to build the model, with more credit going to those that use recycled materials or build their own parts (rather than buying ready-made parts).

## 2) Research Diary

Schools/groups should keep a scientific diary as they research and take part in the activities and experiments. These do not need to be neat but could include records, photos, sketches and results from the investigations.

This can be done in jotters/notebooks or even digitally if possible, on tablets using an app.

## 3) Research Presentation Poster

We would also like to see a research poster. This could show some nice pictures of group/classwork photographs along with the research findings such as the results of the school energy and water audits.

## The competition

We are inviting all schools and groups who take part in the Climate Smarter project to showcase **their work in progress** at our 2020 Regional Celebrations of STEM.

These will be taking place:

- **Highlands & Islands Celebration, Eden Court Theatre, Inverness, Thursday 5<sup>th</sup> March 2020**
- **Dundee Regional Celebration, Dundee Science Centre, Friday 13<sup>th</sup> March 2020**
- **Ayrshire Celebration, Dumfries House, Cumnock, Tuesday 17<sup>th</sup> March 2020**
- **North East Celebration, Shell Woodbank House, Aberdeen, Friday 27<sup>th</sup> March 2020**
- **South of Scotland Celebration, Borders College STEM HUB, Wednesday 1<sup>st</sup> April 2020**

Please note that we can only accept 1 model per school at our celebration events. We would encourage pupils to build lots of models in small groups, then have a class vote to decide on your favourite.

**The Finals of the competition will take place at the Glasgow Science Centre, at our National Celebration of STEM on Friday 5<sup>th</sup> June 2020. We ask that all pilot schools try to attend one regional event and/or the national celebration.** Full details and registration can be found [here](#)

The YESC team will be on hand throughout the duration of the project to offer support and guidance. We love to hear from you, so please do not hesitate to contact us if you have any questions about Climate Smarter

## Curriculum Links

This project is designed to be cross-curricular and cover a wide range of experiences and outcomes. It is up to you how you use the resources, and how you incorporate them into your teaching plan as we want this to be as flexible as possible. Below is a list of the key experiences and outcomes that this programme may support however it could also include others depending on how you use the kit.

### Science

#### Energy sources and sustainability

By considering examples where energy is conserved, I can identify the energy source, how it is transferred and ways of reducing wasted energy. **SCN 2-04a**

Through exploring non-renewable energy sources, I can describe how they are used in Scotland today and express an informed view on the implications for their future use. **SCN 2-04b**

By investigating renewable energy sources and taking part in practical activities to harness them, I can discuss their benefits and potential problems. **SCN 3-04b**

#### Processes of the planet

I can explain some of the processes which contribute to climate change and discuss the possible impact of atmospheric change on the survival of living things. **SCN 3-05b**

#### Forces electricity and waves

By investigating how friction, including air resistance, affects motion, I can suggest ways to improve efficiency in moving objects. **SCN 2-07a**

**By contributing to investigations of energy loss due to friction, I can suggest ways of improving the efficiency of moving systems. **SCN 3-07a****

I have used a range of electrical components to help to make a variety of circuits for differing purposes. I can represent my circuit using symbols and describe the transfer of energy around the circuit. **SCN 2-09a**

To begin to understand how batteries work, I can help to build simple chemical cells using readily available materials which can be used to make an appliance work. **SCN 2-10a**

I can help to design simple chemical cells and use them to investigate the factors which affect the voltage produced. **SCN 3-10a**

#### Topical Science

Through research and discussion, I have an appreciation of the contribution that individuals are making to scientific discovery and invention and the impact this has made on society. **SCN 2-20a**

I can report and comment on current scientific news items to develop my knowledge and understanding of topical science. **SCN 2-20b**

I have collaborated with others to find and present information on how scientists from Scotland and beyond have contributed to innovative research and development. **SCN 3-20a**

## Literacy and English

### Tools for listening and talking

When I engage with others, I can respond in ways appropriate to my role, show that I value others' contributions and use these to build on thinking. **LIT 2-02a**

I can respond in ways appropriate to my role and use contributions to reflect on, clarify or adapt thinking. **LIT 3-02a**

### Finding and using information

I can select ideas and relevant information, organise these in an appropriate way for my purpose and use suitable vocabulary for my audience. **LIT 2-06a**

I can independently select ideas and relevant information for different purposes, organise essential information or ideas and any supporting detail in a logical order, and use suitable vocabulary to communicate effectively with my audience. **LIT 3-06a**

## Social studies

### People, place and environment

I can discuss the environmental impact of human activity and suggest ways in which we can live in a more environmentally responsible way. **SOC 2-08a**

I can identify the possible consequences of an environmental issue and make informed suggestions about ways to manage the impact. **SOC 3-08a**

I can investigate the climate, physical features and living things of a natural environment different from my own and explain their interrelationship. **SOC 3-10a**

By comparing my local area with a contrasting area out with Britain, I can investigate the main features of weather and climate, discussing the impact on living things. **SOC 2-12a**

I can investigate the relationship between climate and weather to be able to understand the causes of weather patterns within a selected climate zone. **SOC 3-12a**

## Numeracy and mathematics

### Estimation and rounding

I can use my knowledge of rounding to routinely estimate the answer to a problem then, after calculating, decide if my answer is reasonable, sharing my solution with others. **MNU 2-01a**

I can round a number using an appropriate degree of accuracy, having taken into account the context of the problem. **MNU 3-01a**

### Number and number processes

Having determined which calculations are needed, I can solve problems involving whole numbers using a range of methods, sharing my approaches and solutions with others. **MNU 2-03a**

I can use a variety of methods to solve number problems in familiar contexts, clearly communicating my processes and solutions. **MNU 3-03a**

## Measurement

I can use the common units of measure, convert between related units of the metric system and carry out calculations when solving problems. [MNU 2-11b](#)

I can solve practical problems by applying my knowledge of measure, choosing the appropriate units and degree of accuracy for the task and using a formula to calculate area or volume when required. [MNU 3-11a](#)

## Data and analysis

I have carried out investigations and surveys, devising and using a variety of methods to gather information and have worked with others to collate, organise and communicate the results in an appropriate way. [MNU 2-20b](#)

I can work collaboratively, making appropriate use of technology, to source information presented in a range of ways, interpret what it conveys and discuss whether I believe the information to be robust, vague or misleading. [MNU 3-20a](#)

I can display data in a clear way using a suitable scale, by choosing appropriately from an extended range of tables, charts, diagrams and graphs, making effective use of technology. [MTH 2-21a / MTH 3-21a](#)

## Expressive arts

### Art and design

I have the opportunity to choose and explore a range of media and technologies to create images and objects, comparing and combining them for specific tasks. [EXA 2-02a](#)

I have experimented with a range of media and technologies to create images and objects, using my understanding of their properties. [EXA 3-02a](#)

I can create and present work that shows developing skill in using the visual elements and concepts. [EXA 2-03a](#)

I can use and combine the visual elements and concepts to convey ideas, thoughts and feelings in expressive and design work. [EXA 3-03a](#)

I can develop and communicate my ideas, demonstrating imagination and presenting at least one possible solution to a design problem. [EXA 2-06a](#)

While working through a design process in response to a design brief, I can develop and communicate imaginative design solutions. [EXA 3-06a](#)

## Technologies

### Digital Literacy

I can extend and enhance my knowledge of digital technologies to collect, analyse ideas, relevant information and organise these in an appropriate way. [TCH 2-01a](#)

I can explore and use the features of a range of digital technologies, integrated software and online resources to determine the most appropriate to solve problems [TCH 3-01a](#)

I can investigate how product design and development have been influenced by changing lifestyles. [TCH 2-05a](#)

I understand how scientific and technological developments have contributed to changes in everyday products. [TCH 3-05a](#)

## Technological Developments in Society and Business

I can analyse how lifestyles can impact on the environment and Earth's resources and can make suggestions about how to live in a more sustainable way. **TCH 2-06a**

I can evaluate the implications for individuals and societies of the ethical issues arising from technological developments. **TCH 3-06a**

I can make suggestions as to how individuals and organisations may use technologies to support sustainability and reduce the impact on our environment. **TCH 2-07a**

I can identify the costs and benefits of using technologies to reduce the impact of our activities on the environment and business. **TCH 3-07a**

## Craft, Design, Engineering and Graphics

I can extend and enhance my design skills to solve problems and can construct models. **TCH 2-09a**

I can create solutions in 3D and 2D and can justify the construction/graphic methods and the design features. **TCH 3-09a**

I can recognise basic properties and uses for a variety of materials and can discuss which ones are most suitable for a given task. **TCH 2-10a**

I can explore the properties and performance of materials before justifying the most appropriate materials for a task. **TCH 3-10a**

I can use a range of graphic techniques, manually and digitally, to communicate ideas, concepts or products, experimenting with the use of shape, colour and texture to enhance my work. **TCH 2-11a**

I can extend my knowledge and understanding of engineering disciplines to create solutions. **TCH 2-12a**

I can apply knowledge and understanding of engineering disciplines and can develop/ build solutions to given tasks. **TCH 3-12a**

## Computing Science

I can explain core programming language concepts in appropriate technical language. **TCH 2-14a**

I can create, develop and evaluate computing solutions in response to a design challenge. **TCH 2-15a**

I can select appropriate development tools to design, build, evaluate and refine computing solutions based on requirements. **TCH 3-15a**

## Health and wellbeing across learning

### Social wellbeing

Representing my class, school and/or community encourages my self-worth and confidence and allows me to contribute to and participate in society. **HWB 2-12a / HWB 3-12a**

Through contributing my views, time and talents, I play a part in bringing about positive change in my school and the wider community **HWB 2-13a / HWB 3-13a**

I value the opportunities I am given to make friends and be part of a group in a range of situations. **HWB 2-14a / HWB 3-14a**
